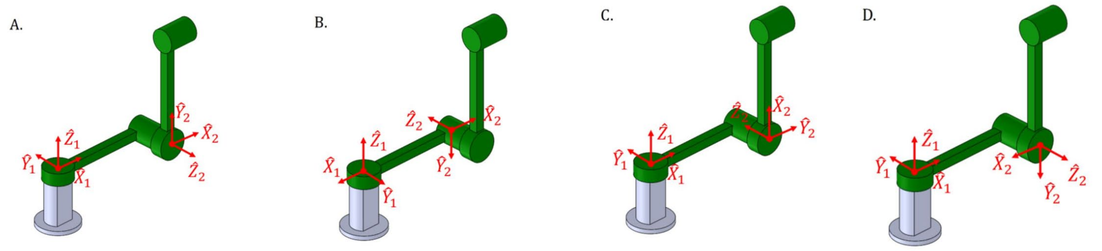
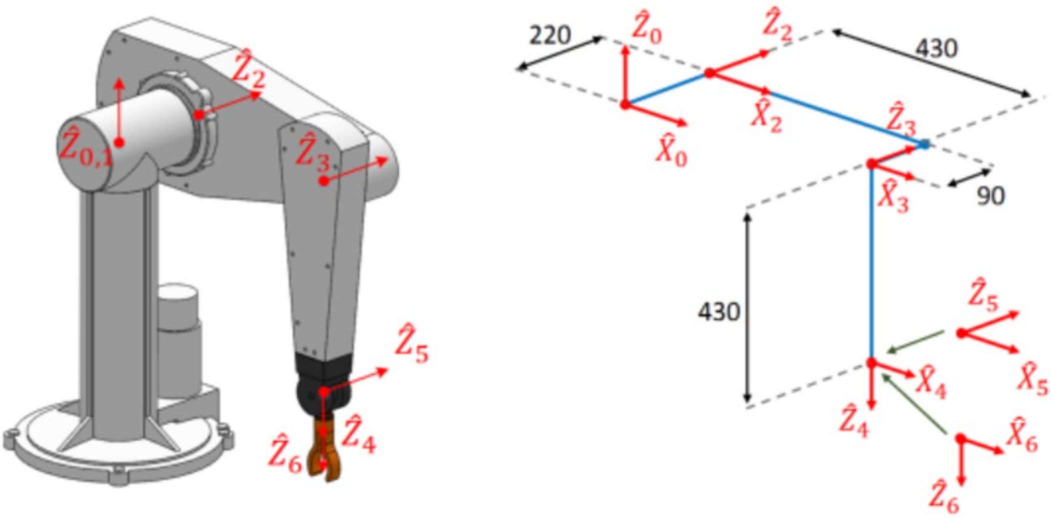
Assignment 1 - which of the following is the correct frame assignment on the RR manipulator?



A B C D

Assignment 2 - the following is a PUMA560 6-axis robotic arm, the arm posture is defined in the figure as 0°in all axes, please refer to the length of each link provided in the figure, the origin of the defined frame {0}-{6} and the Z-axis, give the DH table.



Assignment 3 - continuing from the previous question, the angles of the six joints are $\theta_1 = 15°$, $\theta_2 = -40°, \theta_3 = -50°, \theta_4 = 30°, \theta_5 = 70°, \theta_6 = 25°$.

- **What is the homogeneous transformation matrix of frame{2} relative to frame {1} ?**
- **What are the coordinates of the origin of frame {4} relative to frame {0}?**
- **What is the homogeneous transformation matrix ${}^0_6T$ of frame {6} relative to frame {0}?**
